- Improve Account Security

Let's make your account more secure

Your account security: Low

We're always working on ways to increase safety in our community. That's why we look at every account to make sure it's as secure as possible.

This is easy as just confirming your phone number and email address. You should have created a strong password. All these steps show the site that we really care about our account and don't just a random visitor.

This is easy as just confirming your phone number and email address. You should have created a strong password. All these steps show the site that we really care about our account and don't just a random visitor.

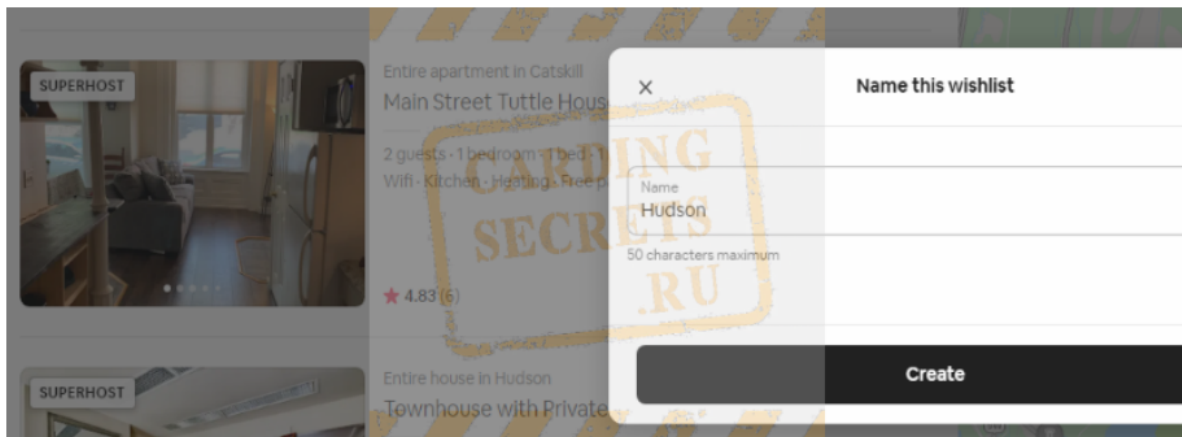

Each new account **setup** is very necessary in carding. Most sites record your **time of account creation** and you time of **first purchase**, they should never be too close, always take your time to spend some moments exploring the site.

- Add to Wishlist

Next, we will add a payment method but a more professional way to do this is **with a reason**. We will add a **hotel to Wishlist** and this will make the site see we already have a preference, so when we add our wcc fullz, it will be for checkout reason. I just picked a random hotel after browsing for some minutes and added to Wishlist.

- Add Payment method

Now with our item on wishlist, we can add our payment option now which the site will use for checkout. Go to **settings** tab and click on **payments and payouts** as below

If you check the image, you can see the different types of payment options you can add to the site

Credit card will our preferred method since we want to use funds from the card we got from wcc.

Add names, card number and address and link your card. If live you should have no problems linking it. If you have problems with the card, be sure to ask replacement from wcc admin.

- How to Checkout

Find your preferred hotel from wishlist, if not added to wishlist, first make sure you add and then checkout **from wishlist**.

Select the **dates** and number of guests and go to checkout page. Make sure you the total cost can be handled by the card you chose. **Card balance checker on wcc** should help you determine which price you should go for. If a card has \$500 Bal, you can't card \$500, be reasonable and act according to the balance on the card
